

## Current Status & Way Forward

The **project team** successfully developed a prototype version of the HIGH-TOOL model and presented it to DG MOVE staff during the Second User Workshop in May 2014. The prototype provided a valuable basis for collecting feedback from EU policy experts and allowed the HIGH-TOOL developers to gain experience in modular tool development approaches.

**Based on lessons learnt** with the prototype development and after careful analysis of user requirements, the project team is currently developing the next version of the HIGH-TOOL model. At this stage, main tasks involve detailing, extension of the demand modelling from a national to a regional level (NUTS-2) and research that will allow the model to become responsive to a wide range of policy measures.

The **current concept** for the overall structure of the final HIGH-TOOL model is displayed in this leaflet.

## Project Coordinator

**Dr. Eckhard Szimba**

*Karlsruhe Institute of Technology (KIT)  
Network Economics*

Phone: +49 721 608-47689
